## Graduate School of Medical and Dental Sciences

### JAPAN

#### More Than 70 Research Fields

There are many fields of research, and you can play a vital role in the progress of medicine and dentistry. Why not learn the latest medical and dental research, acquire skills, and be a part of the future of healthcare?

#### Continuing Education and Skill Improvement

We encourage working professionals to join our curriculum to improve their research skills. We will train experts in various fields and produce researchers who can conduct and lead medical research.

#### Basic and Clinical Science Research

We offer superior educational support by providing three supervising faculty members for every postgraduate researcher.

#### International Level Research

You can take advantage of our cutting-edge international caliber medical and dental research capabilities.
